OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- IT is an ever-evolving field with many new technologies introduced in a rapid bases
- It is important to provide your developers with the best possible technologies to keep the company ahead
- Data presented will show current and future technologies utilized by developers

INTRODUCTION

- This presentation aims to show future skill requirements necessary for companies moving forward
- It will also help make data-driven hiring choice

METHODOLOGY

- A modified version of a Stack Overflow data set was used to pull current and future trends in technologies being used.
- The data was wrangled and cleaned for analysis and visualization
- Both Python and IBM Cognos Analytics was used to help visualize the data
- Average Salaries were obtained by utilizing web scraping

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 5 Language Worked With

Next Year

Top 5 Language Desire Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript is the most popular language currently
- HTML/CSS continues to be a close second
- Python seems to be at the very bottom of the top 5 languages

Implications

- JavaScript and HTML/CSS continue to be the most popular languages
- Python has jumped from 5th to 3rd most desired language
- TypeScript is now the 5th most desired language

DATABASE TRENDS

Current Year

Top 5 Database Worked With

Next Year

Top 5 Database Desire Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL appears to be the leading Database to work with
- Microsoft SQL Server appears to be the second most popular database to work with
- MongoDB appears to be the least popular out of the top 5 databases to work with.

Implications

- PostgreSQL is projected to be the most popular database to work with next year
- MySQL is projected to go from the leading database technology to the 4th most popular database
- Redis is also projected to appear on the Top 5 while Microsoft SQL Server is off the top 5

DASHBOARD

Here is the link to the dashboard created from the data :
https://us1.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my_folders%2FIBM%2BData%2BAnalyst%2BCapstone%2BFinal&action=view&mode=dashboard&subView=model000001837b078da8_00000000

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Interest in Python grew quite a bit, and JavaScript as well as HTML/CSS continue to be quite popular
- Database technology changed around quite a bit based on the projected trend
- Men seem to dominate development as a career

Implications

- Continue to hire people with JavaScript and HTML/CSS knowledge, but also start including people with knowledge of python.
- Due to the rapidly changing pace of Database technologies, hire new people with the skills projected for next year
- Start putting out ads to attract more women to development as a career

CONCLUSION

- Hire new people with knowledge of recent Database technologies
- Teach people who know JavaScript and HTML/CSS Python
- Cycle out less prevalent technologies to make the company more efficient
